## PROFESSIONAL SUMMARY

Senior Flutter Mobile Developer with **6+ years of professional Flutter development experience** and 8+ years in software engineering. Technical owner of two production Flutter platforms at AYANA Hospitality — a guest-facing app processing **6.1M+ analytics events/month** across iOS, Android, and Web, and a field-staff app that grew **239% MAU in 6 months**. Deep expertise in Clean Architecture, Domain-Driven Design, BLoC, and real-time systems (MQTT, WebRTC, GPS streaming). Proven ability to reduce technical debt at scale, drive product analytics decisions, and collaborate cross-functionally with Product, Design, QA, and Backend teams to deliver measurable business outcomes.

---

## KEY ACHIEVEMENTS

- ◆ 8+ years software engineering · 6+ years professional Flutter development
  - ◆ Delivered 10+ production mobile applications across hospitality, fintech, edtech, and healthcare domains
  - ◆ Architected hospitality platforms processing 7.4M+ monthly analytics events across Android, iOS, and Web
  - ◆ Grew field-staff app MAU 239% in 6 months (376 → 1,275 MAU) through UX and architecture improvements
  - ◆ Achieved 97% state management test coverage — 2,302 automated tests across two production apps
  - ◆ Built real-time systems using MQTT, WebRTC, GPS streaming, socket.io, and event-driven architectures
  - ◆ Drove product roadmap decisions through analysis of 179K+ monthly analytics events in PostHog
- 

## PROFESSIONAL EXPERIENCE

### Senior Mobile Developer · AYANA Hospitality

Dec 2025 – Present

*Technical owner and lead Flutter engineer for two production hospitality platforms within a 6-person cross-functional engineering team, supporting millions of monthly analytics events across Android, iOS, and Web.*

- ▶ Architected and own a large-scale Flutter guest platform (26 feature modules, 18 domain packages, 22 shared SDK modules) processing **6.1M+ analytics events/month** across multiple AYANA resort properties (Bali, Komodo, Jakarta) with 4-language support (EN/ID/JP/KR).
- ▶ Grew MyCTE field-staff app MAU by **239% in 6 months (376 → 1,275 MAU)** by implementing a SWR cache-first data strategy across 12 domain repositories, enabling reliable UX in low-connectivity resort environments.
- ▶ Maintained **97% unit test coverage on state management** (819 tests / 108 files) in MyCTE; 1,483 tests across 444 files in the guest app — within a 6-person engineering team.
- ▶ Resolved critical production crashes affecting **4,500+ users**: diagnosed and fixed a 401 auth token refresh loop (457 users, 6,879 events) and Hive cache corruption (4,107 users) via a centralized auth interceptor in the shared networking SDK.
- ▶ Built real-time guest transportation tracking using **MQTT + GPS streaming + event-driven state management** for buggy dispatch across resort properties.
- ▶ Drove product roadmap decisions by analyzing **179K+ monthly events in PostHog**, identifying workflow bottlenecks and user adoption gaps that directly influenced feature prioritization.
- ▶ Reduced technical debt by 1,100+ lines across a 49+ file feature module; enforced strict 3-layer architecture boundaries (Feature → Repository → Shared SDK) and extracted reusable components.

- ▶ Designed AI-powered guest engagement features with feature-flag rollout strategies and full observability via Sentry, Crashlytics, and PostHog instrumentation.

**Tech:** *Flutter, Dart, BLoC, MQTT, Stream.io, Firebase, PostHog, Sentry, Crashlytics, REST API, Clean Architecture, DDD*

## Mobile Developer · **Ajari Technologies**

*Aug 2024 – Nov 2025*

*Delivered multiple Flutter products across edtech, AI, collaboration, and secure communication domains.*

- ▶ Architected LearnXpert, a real-time collaborative learning platform supporting **800+ concurrent users** — designed scalable session management and state synchronization architecture from the ground up.
- ▶ Implemented WebRTC and socket.io integrations for low-latency peer-to-peer communication and live collaborative sessions.
- ▶ Built AI-integrated laboratory management with NFC-based access control and biometric authentication; designed security architecture for a secure messaging platform.

**Tech:** *Flutter, Dart, WebRTC, socket.io, NFC, Firebase, BLoC, Clean Architecture, AI Integration*

## Mobile Developer · **MSIG Indonesia**

*Jan 2024 – Sep 2024*

- ▶ Led Flutter application modernization using Domain-Driven Design and modular architecture, measurably reducing bug report volume through architecture refactoring and reusable module extraction.
- ▶ Improved team onboarding efficiency through structured code organization, module documentation, and enforced architectural conventions.

**Tech:** *Flutter, Dart, DDD, Modular Architecture, BLoC*

## Mobile Developer · **Member.id (Kawano Group)**

*2022 – 2023*

- ▶ Developed and maintained Flutter applications for Kawano Group; implemented Firebase Cloud Messaging and analytics integrations; published to App Store and Google Play.

## Mobile Developer · **Kompas Gramedia**

*Aug 2022 – Dec 2022*

- ▶ Revamped gramedia.com mobile app using Flutter; contributed to checkout optimization and product discovery enhancements, improving modularity and application performance.

## Senior Mobile Developer · **Indocyber**

*2021 – 2022*

- ▶ Led migration prototype of **BNI Mobile Banking** from Cordova to Flutter — established Clean Architecture and BLoC foundations for one of Indonesia's largest banking platforms.

## Mobile Developer · **Advomatrix**

*2020 – 2021*

- ▶ Built telemedicine platform with video consultation, appointment scheduling, and real-time messaging; delivered healthcare solutions alongside backend and web teams.

## Mobile Developer · **Deeplabs**

*2019 – 2020*

- ▶ Developed RFID-based inventory management systems and Flutter applications featuring real-time chat, media sharing, and location services; built web administration dashboards.

---

## TECHNICAL SKILLS

**Mobile Platforms:** Flutter · Dart · Android (Kotlin) · iOS · Flutter Web

**Architecture:** Clean Architecture · Domain-Driven Design (DDD) · SOLID · Modular / Feature-based Architecture · System Design

**State Management:** BLoC · Cubit · Riverpod · Provider

**Real-Time & Network:** MQTT · WebRTC · socket.io · WebSocket · REST API · Dio · Retrofit · GPS / Live Location Streaming

**Backend & Infra:** Firebase · Push Notifications · Event-Driven Architecture · CI/CD · Git / GitHub

**Observability:** PostHog · Sentry · Firebase Crashlytics · Feature Flags · Product Analytics

**Testing:** Unit · Widget · Integration Testing · 97% State Management Coverage · 2,302 automated tests

**Process:** Code Review · Architecture Review · Cross-functional Collaboration (PM · Design · QA · Backend)

---

## EDUCATION

Bachelor of Computer Science · [STIKI Malang](#)

2015 – 2021

---

## CERTIFICATIONS

- BCA Bank Scholarship Bootcamp — Android & Fullstack Developer
  - Flutter Development · Clean Architecture in Flutter · Mobile Application Architecture
- 

## LANGUAGES

**Indonesian** Native

**English** Professional Working Proficiency
